Search Superfund Site Information

Fiscal Year 2013 Program progress) for public reporting until a complete and accurate SEMS data set is available. Program will continue to rely on the final CERCLIS data set (dated November 12, 2013, which reflects official end of System (SEMS). Efforts to migrate data to SEMS and to enhance data quality control are now in the final stages. The In 2014, the Superfund Program implemented a new information system, the Superfund Enterprise Management

JACKSONVILLE ASH SITE

Contaminants

Site Info | Aliases | Operable Units | Contacts Actions | Contaminants | Site-Specific Documents

of concern is a process that requires the assessor to examine contaminant concentrations at the site, the quality of chemical substances that the health assessor selects for further evaluation of potential health effects. Identifying contaminants environmental sampling data and the potential for human exposure. The below list only includes contaminants identified as contaminants of concern (COCs) for this site. COCs are the site-specific
